

# SOLAR ENERGY POLICY

Kochi Metro Rail Limited (KMRL), in keeping with the objective of the Kerala Solar Energy Policy and National Solar Mission, is strongly driven to promote, establish and make use of Solar Energy to reduce the greenhouse gas emissions and related impacts of climate change. KMRL is contributing to the Kerala State Solar Policy mission of being a part of the solution for combating the energy crisis faced, by making itself energy neutral.

In pursuit of achieving the above strategic corporate goal, KMRL is promoting solar energy application in all its areas, as far as possible, to gain green and clean power.

The vision is to achieve the above goal by exploring locations where solar plants can be installed and accordingly adopt a suitable design approach in the early stage of the project.

KMRL will strive to put in place an appropriate investment climate that could leverage promotion of projects in the area of Solar Power generation and utilisation.

KMRL will provide adequate training, create awareness to tap potential of low cost robust technology for the plant and its maintenance. This Solar Energy policy is in line with our internal policies and also complies with the local and national legislation related to solar energy.
